## INTRODUCTION

### Placer Mining Records in Yukon

Placer gold drew increasing numbers of prospectors and miners to the North during the last quarter of the nineteenth century. Most came from the United States, and brought with them American concepts of self-administered mining camp law.

Canadian authorities gradually accepted the necessity of imposing Canadian mining regulations in Yukon, and in 1894 Inspector Charles Constantine, NWMP, was sent to take up residence at the settlement of Forty Mile on the Yukon River. He was appointed “Agent of the Dominion Government”, and was charged with administering the mining regulations of the North West Territories. These dated back to 1889, and had been designed for application on the prairies.

During the years that followed, many confrontations developed between local miners, officials on the spot, and politicians in Ottawa regarding the scope and content of Yukon’s mining regulations. At stake were the prosperity of individual miners, as well as the level of government revenues to be derived from mining.

Between 1894 and 1906, Yukon mining regulations were frequently altered and adjusted by Federal Order-in-Council. In some cases regulations were changed up to three times in a single year, in an attempt to satisfy the demands of the mining community, and still provide sufficient levels of government revenue. In 1906 a Yukon Placer Mining Act was approved by Parliament. This was amended in minor respects in subsequent years, however its provisions have remained the basis of placer mining law in Yukon up to the time of writing.

During the Klondike gold rush federal Ministers of the Interior exercised control over four main variables in their efforts to devise equitable mining regulations for Yukon. These dealt with:

- The size of placer claims and the fees and procedures for registering claims
- The fees and procedures for renewing placer claims and registering their successive ownership
- The levying of royalties on placer gold
- The registration of miners through Free Miners certificates

The size of placer claims was of central importance to miners, as this largely determined the extent of the economic base to which a miner could gain access. Claim size varied greatly as the table below shows:

### Length of Creek Claims 1889-1906

<i>Date of Regulation</i>	<i>Length of Claim</i>
1889 (NWT Regulations)	100 feet
Dec. 24, 1894	500 feet
Aug. 16, 1897	100 feet
Jan. 18, 1898	250 feet
July 31, 1905	500 feet
1906 (Yukon Placer Mining Act)	500 feet

The regulations provided for larger discovery claims, and also prescribed the fees to be charged for registering a claim. At the height of the gold rush, provisions were even made to reserve certain claims by the crown for sale at auction. Grouping claims and granting hydraulic concessions was a practice that proved highly controversial in the early years of the century.

After registering a placer claim, the miner was entitled to work his property for one year, at the end of which he had to meet certain conditions in order to continue to mine. At first only an annual claims renewal fee was charged. At different times this was as high as \$100 and as low as \$15. In 1898, however, the Certificate of Work was introduced, a concept which was refined in the years that followed. Generally it required a miner who was renewing, to file an affidavit verifying that \$200 worth of work had been done on his claim in the past year.

Over the years a detailed fee structure evolved, under which Mining Recorders charged for a wide range of additional services. The regulations for 1902 even authorized mining recorders to charge 25¢ for giving out information verbally. The fee structure continued to be adjusted until it was enacted into legislation in 1906, from which time it has remained largely unaltered.

The mining recorder was also responsible for collecting royalties on gold productions. A ten percent royalty was first levied in 1897, with a twenty percent royalty due on gold taken from claims producing in excess of \$500 a week. Royalties were unpopular and difficult to collect, and were reduced over the years.

The twenty percent surtax was removed in 1898, as were royalties on claims producing less than \$2,500 a year. This exemption was raised to \$5,000 in 1901, when the rate of royalty dropped from ten to five percent. The Placer Mining Act of 1906 reduced the royalty to only two and one-half percent, and placed the onus for payment on the shipper exporting the gold from the Territory. In estimating the royalty payable, gold was to be valued at \$15 an ounce. These provisions were still in force at time of writing.

Another means of regulating and deriving revenue from the mining industry was through a licensing system. In 1898 the regulations introduced a requirement that all persons and companies involved in mining must have a Free Miners Certificate, which authorized its owner freely to engage in mining. The cost was \$10 a year, though by 1905 this had been reduced to \$7.50 for the first, and \$5 for subsequent years. Higher fees applied to mining companies. The Yukon Placer Mining Act of 1906, however, abolished the Free Miners Certificate.

Other matters with which placer regulations have dealt include the grouping and relocation of claims, the assignment of water rights, and the abandonment of claims. Special hydraulic and dredging regulations have also been put into force over the years to control larger scale mining. Since 1970, the Northern Inland Waters Act has superceded some sections of the Yukon Placer Mining Act, controlling the allocation of water rights for placer mining today.

The Act of 1906 provided for the appointment of mining recorders for each mining district in the Territory. The Act ordered, and still requires, these officials to maintain all documents relating to mining property and to keep the following books:

- 1) Records of Applications
- 2) Record of Refused Applications
- 3) Record Book
- 4) Record of Abandonments
- 5) Record of Documents Received

The earliest placer mining records still in existence date from 1896. Mining Records today are maintained under the auspices of the federal Department of Indian and Northern Affairs. In the early 1970's the historic significance of the these records was recognized and arrangements were

made to organize and microfilm non-current mining records and to transfer originals to the Yukon Archives for permanent retention.

The present organization of these records reflects, as closely as possible, that devised for them at the time they were microfilmed. Under this system, placer records were divided into eleven subject classifications and two miscellaneous groupings. For the most part, the records have been assigned the headings under which they appeared in the microfilm, even when these headings seem to have been assigned incorrectly. In order to clarify such errors, certain records have been listed twice, once under the category assigned at microfilming, and again under what appears to be a more correct heading. Only one miscellaneous heading has been retained.

It should be noted that Yukon quartz mining records were microfilmed along with the Territory's placer mining records, and they were also deposited at the Yukon Archives. Quartz records do not, however, form a part of this finding aid, though an interim inventory of the records is available.

The Yukon Archives provides free public access to the mining records in its custody. They have proven a valuable source to genealogists and environmental researchers, as well as representing a major source of information concerning past and possible future resource exploitation in Yukon.

## I-1 APPLICATIONS FOR GRANTS FOR PLACER MINING, 1896-1971

In order to obtain a placer mining grant, a miner had to stake the ground where he intended to mine and record his claim at a mining recorder's office. This was done by completing an application form which included such information as the miner's name, address, Free Miners Certificate number, when and where his claim was located as well as its size. Occasionally a sketch map accompanied the application, particularly after 1940

Applications were given consecutive numbers. Between 1896 and 1900, series of numbers were frequently used more than once.

There were three means of locating a particular application within I-1. Daily registers were kept of grant applications received at mining recorder's offices. These registers are listed in section I-2, and are mainly chronological in organization. Records were also kept of every change in ownership that took place on individual claims. These books, organized by creek, are listed in I-7. A record was also maintained of the first miner to obtain the grant of a newly staked claim. These alphabetically arranged volumes are listed in I-8.

A box list has been prepared showing the various series of numbers used on grant applications, the years they were used, and the archives volume number in which they have been stored. This box list follows:

<i>Location</i>	<i>Document Numbers</i>	<i>Dates</i>

## I-2 RECORDS OF APPLICATIONS FOR PLACER MINING, 1896-1924

This section contains three main types of records. They were all compiled to provide access to the Applications for Placer Mining Grants contained in section I-1.

Most volumes in series I-2 are registers, detailing information about particular numerical blocks of grant applications. The volumes usually give the applicant's name, the date and the claim applied for, all in the order the applications were received.

Some of these volumes are arranged geographically by creek and claim number, including some copies of creek record books that were later incorporated in the record books listed in section I-7.

Books described as "re-locations" record transactions in which a claim forfeited or abandoned by one miner is taken up by another.

<i>Location</i>	<i>Title / Description</i>	<i>Date</i>
GOV 288	Copy of original application books Arrangement: numerical Coverage: Dawson area	1896-1898
GOV 289	Relocations 1 <sup>st</sup> June, 1899 Arrangement: by creeks Coverage: Indian River and Troandike Mining Divisions, Sundries	1899
GOV 290	No. 1 Applications Arrangement: numerical Coverage: Dawson area	1896-1897
GOV 291	Relocations Stewart River Arrangement: by creek Coverage: Thistle, Kirkman, Scroggie, Ballarat, Tulare, Selwyn	1899
GOV 292	Applications #2 Arrangement: numerical Coverage: Yukon generally	1898
GOV 293	#3 Applications Arrangement: numerical Coverage: Dawson area	1898
GOV 294	Locations Arrangement: creeks arranged in book alphabetically; applications under each creek listed in numerical order Coverage: Yukon generally	1901-1907
GOV 295	Placer Mining Grants Arrangement: numerical Coverage: Dawson area	1898-1899
GOV 296	Placer Mining Grants Arrangement: numerical Coverage: Dawson area, including some accounts from Gold Commissioner's office	1899

<i>Location</i>	<i>Title / Description</i>	<i>Date</i>
GOV 297	Relocations Arrangement: numerical                      Coverage: Dawson area	1898-1899
GOV 298	Locators Clear Creek and Barlow Arrangement: alphabetical sections list mines and their claims in order of staking Coverage: Barlow and Clear Creek district	1900-1906
GOV 299	Record Book Tributaries of Klondike and Hunker Arrangement: by tributary and claim number Coverage: Tributaries of Klondike and Hunker	1898
GOV 300	Record Book: Klondike River tributaries Arrangement: by creek and claim number Coverage: Bear, Quigley, Too Much Gold, Alki, and Lucky	1898
GOV 301	Pending Applications, Extension of Boundaries Arrangement: chronological Coverage: Dawson area	1906-1907
GOV 305	Pending Applications of Relocations Arrangement: entries under creek name in chronological order Coverage: Dawson area	1900-1901
GOV 306	Pending Applications Arrangement: entires under creek name in chronological order Coverage: Dawson area	1903-1906
GOV 307	Record of Applications, Tributaries of Sixty Mile River Arrangement: by creek and claim number Coverage: Sixty Mile area	1914-1917
GOV 367	Placer Grants Stewart Arrangement: alphabetical sections list miners and their claims in order of staking Coverage: Stewart River area	1898-1902

### I-3 REGISTERED DOCUMENTS (PLACER MINING) 1897-1971

Most documents pertaining to the ownership of placer claims were registered in the mining recorders office. Included were liens, mortgages, assignments, and bills of sale. These documents were given consecutive numbers when received, with some series of numbers being used more than once.

There are two ways of obtaining access to documents in I-3. Daily registers of placer documents received were maintained by mining recorders. These are mainly organized chronologically and appear in I-4. Record books were also maintained listing all documents registered that affected a particular claim. These records are organized by creek and claim number and appear in I-7.

A box list has been prepared showing the various series of numbers used in registering documents, the years they were used and the archives volume numbers in which they are stored. This box list follows:

<u>Location</u>	<u>Document Number</u>	<u>Dates</u>
GOV 510	1M - 428M	June 1897 - November 1898
GOV 511	1A - 200B	July 1898 - February 1899

## I-4 RECORDS OF PLACER DOCUMENTS RECEIVED, 1896-1961

These records have been divided into two main categories. The first encompasses numerical / chronological registers of legal documents dealt with by the Mining Recorder's Office. The documents referred to are usually those located in section I-3.

The second category of records consists mainly of registers of assignments. These volumes are similar in many respects to the Record Books kept in section I-7. They are concerned with the sale and mortgaging of mineral claims, and refer to documents in I-3.

Among other records included in this section are alphabetical registers of those buying and selling interests in claims, and alphabetical registers of those granting and receiving power of attorney.

### Document Registers

Arrangement: by document number unless otherwise noted

Coverage: Dawson area or Yukon generally unless otherwise noted

<i>Location</i>	<i>Title / Description</i>	<i>Date</i>
GOV 365	Livingston Creek (copy) Coverage: Livingston Creek	1909-1924
GOV 829	Registered Documents	Aug. 1900
GOV 830	Registered Documents	May - July 1899
GOV 834	Registered Documents Arrangement: Alphabetical by grantor's and grantee's name Coverage: Stewart River	1899-1902
GOV 836	Registered Documents Sixty Mile area	1903-1905
GOV 839	Registered Documents Placer	1915-1919
GOV 840	Registered Documents Placer	1908-1911
GOV 841	Registered Documents Placer	1911-1915
GOV 842	Bills of Sale (and registered documents) Arrangement: Alphabetical by grantor's and grantee's name	1902-1906
GOV 843	Registered Documents	1899-1900
GOV 844	Registered Documents Placer	1927-1940
GOV 845	Registered Documents Placer	1918-1927
GOV 846	Registered Documents Placer	1939-1961
GOV 847	Bills of Sale (and Registered Documents) Arrangement: Alphabetical by grantor and grantee's name	1905-1907
GOV 849	Bills of Sale (and Registered Documents) Arrangement: Alphabetical by grantor and grantee's name	1896-1898
GOV 1189 (1)	Government Auction Sales Arrangement: Alphabetical index cross-references the various creeks. Claims are listed along with prices received. Coverage: Dawson area	1900

<u>Location</u>	<u>Title / Description</u>	<u>Date</u>
GOV 1189 (2)	Register Arrangement: Chronological by instrument number. Coverage: Instrument number 1m-421m. This cross-references documents in GOV 510.	1897-1898

### **Assignments, Etc.**

Arrangement: By creek and claim number unless otherwise noted  
Coverage: as noted

<u>Location</u>	<u>Title / Description</u>	<u>Date</u>
GOV 831	Assignments Coverage: Swedish Creek and tributaries, Hunker, O.K., Empire, Walker, and McDonald	1898
GOV 832	Assignments Coverage: Quartz and Gold Run Creeks and tributaries, Calder, Nine Mile, Ophir, and Rob Roy	1898-1899
GOV 833	Assignments Arrangement: by claim area and concession Coverage: Hunker Creek	1899
GOV 837	Assignments Coverage: Sixty Mile area	1897-1901
GOV 838	Assignments Coverage: Moosehide, Ballarat, Kentucky, Stone, Pocket, Deadwood, Colorado	1898
GOV 848	Power of Attorney Arrangement: Alphabetical by grantor and grantee's name	1897-1959
GOV 850	Old Bills of Sale Arrangement: Chronological within sections for each creek. Includes date but not document number. Includes copies of abstracts of title. There are sections on mortgages, releases and agreements. Coverage: Dawson area and other creeks	1896-1898
GOV 851	Power of Attorney for Staking Arrangement: Alphabetical by grantor's and grantee's name	1906-1940
GOV 852	Summary of operations of Mining Recorder's Office for July 1903. Includes records of most transactions	1903

## I-5 RENEWAL GRANTS FOR PLACER MINING, 1906-1972

The Yukon Placer Mining Act required miners to renew their claims annually. In order to accomplish this, the miner had to file an affidavit indicating how much work he had done on his claim in the previous year. He was then given a certificate of renewal.

This section contains duplicate copies of renewal certificates. These documents contain little significant information, and are arranged in numerical / chronological order. Series of numbers were sometimes used more than once.

In some cases affidavits were filed with the renewal certificates. These affidavits give details as to work undertaken during a particular year.

The best access to the certificates of work is through the Record Books in section 1-7. Renewal numbers for claims are listed there by creek and claim number.

A box listing of the Renewal grants follows.

<u>Location</u>	<u>Document Number</u>	<u>Dates</u>
* GOV 775 - 783	1 - 24,000	1945-1957
* GOV 783 - 789	A151 - A12,304	1957-1972
* GOV 789 - 796	81,401 - 107,200	1933-1944
GOV 797	76,190 - 76,580	1906-1907
GOV 797	7,751 - 7,993	1908-1909
GOV 798	9,001 - 9,250	1908
GOV 799 - 803	81,163 - 107,200	1932-1943
GOV 803	1 - 1,184	1943
GOV 804	1,185 - 11,800	1943-1948
GOV 805	12,001 - 24,000	1948-1958
GOV 806	A298 - A9,100	1958-1967
GOV 807	A9,100 - 11,519	1967-1971
GOV 807	2,501 - 3,000	1911-1914
GOV 807	9,251 - 9,500	1908-1910
GOV 807	16,501 - 16,750	1910-1911
GOV 824	43,479 - 43,727	1916-1917

\* GOVs marked with an asterisk contain renewal certificates only, not affidavits showing work done. They are located in off-site storage. Retrieval may take more than a day.

## I-6 CERTIFICATES OF WORK FOR PLACER MINING

Before the passage of the Yukon Placer Mining Act, a variety of requirements were brought into force that made it incumbent on a miner to spend certain amounts of money on his claim each year in order to renew his ownership of it.

This section contains duplicate copies of the certificates renewing the miner's ownership of his claim. These documents contain little significant information and are arranged in numerical / chronological order. Series of numbers are used more than once, and some certificates are un-numbered.

In some cases affidavits were filed with renewal certificates. These affidavits give details as to work undertaken during a particular year.

The best access to the certificates of work is through the Record Books in section I-7. Renewal numbers for claims are listed there by creek and claim number.

\* Volumes marked with an asterisk contain Certificates of Work only, not affidavits showing work done. They are located in off-site storage. Retrieval may take more than a day.

## I-7 RECORD BOOKS FOR PLACER MINING CLAIMS, 1896-1971

This important group of records comprises more than two hundred books giving access by creek and claim number to many of the other classes of records that were maintained by the Mining Recorder. Generally, each major placer creek had one or more books that contained a page for each claim that was laid out on the creek. The books recorded the various transactions, owners, mortgages, liens, renewals, etc., that were registered against each claim. Entries that were made often cross referenced such items as applications for grants (I-1), registered document numbers (I-3), certificates of renewal (I-5), and certificates of work (I-6).

At first it was thought that about ten record books would be enough, but the amount of business necessitated that additional books be incorporated into the system. It was not long however until these too were full and another set of books was required. So it is quite conceivable that in order to trace the history of a claim, a researcher would have to consult at least three bound ledgers.

The middle of a book was reserved for the first or discovery claim on a creek and all other registered claims were then numbered 1, 2, 3, etc., either above or below discovery and entered before or behind the middle page depending on where they were situated in relation to discovery. Occasionally separate books were maintained for claims registered above and below discovery. Books recording claims above were numbered and known as black indexes, claims below being kept in numbered red indexes. Those books that recorded claims above and below discovery, were assigned both a red and a black index number. Right and left limit, refer to the right or left bank of a creek when looking down stream.

When these records were microfilmed in the early 1970s they were each assigned a single consecutive number. These numbers serve as the main volume identifier in the list that follows.

The more complex red and black index system appears in an appendix to this finding aid. An "Index to Creeks and Tributaries" was created in 1983 and is available on line at: <http://www.btc.gov.yk.ca/archives/findingaids.html> and from the Yukon Archives Reference Assistant.

### Record Books

## I-8 INDEXES OF ORIGINAL LOCATORS, 1896 – 1942

These volumes contain the names of those miners who were the first to obtain the crown grant of a particular placer claim. The date and location of the claim is noted.

Arrangement: Alphabetical by name.

Coverage: Dawson and area or Yukon generally unless otherwise noted.

<i>Location</i>	<i>Description</i>	<i>Dates</i>
GOV 182	Index of Original Locators	1896 - 1901
GOV 183	Index of Original Locators	1898 - 1905
GOV 184	Index of Original Locators	1898 - 1905
GOV 185	Index of Original Locators Coverage: Duncan area	
GOV 186	Index of Original Locators	1914 - 1942
GOV 367	Index to Placer Grants Coverage: Stewart River area	1898 - 1902

## I-9 INDEXES OF FREE MINERS CERTIFICATES, 1898 – 1906

The names of all miners purchasing Free Miners Certificates were recorded in alphabetically arranged index books. Most certificates were issued in Dawson. At various times, however, it was possible to buy these certificates in cities in southern Canada, as well as at offices located in local Yukon communities. These indexes noted the miner's name, certificate number, and the issuing office.

This important group of records contains the names of nearly all stamperders who engaged or hoped to be engaged in mining.

Arrangement: Alphabetical by name of miner unless otherwise noted.  
Coverage: Dawson area or Yukon generally unless otherwise noted.

<u>Location</u>	<u>Title/Description</u>	<u>Dates</u>
GOV 187	Free Miners Certificates for outside offices Arrangement: Alphabetical, subdivided for cities from which certificates were issued. Coverage: Issuing offices include Ottawa, Edmonton, Vancouver, Winnipeg, Atlin, Bennett and Whitehorse, and others	1898 - 1903
GOV 188	Free Miners Certificates, Creeks and outside offices. Coverage: Issuing offices include Vancouver, Tagish, Grand Forks, Dominion, Hunker and others	1898 - 1899
GOV 189	Index of Free Miners Certificates	1898 - 1899
GOV 190	Index of Free Miners Certificates Coverage: Stewart and Mayo, most certificates issued from Duncan	1902 - 1906
GOV 191	Index of Free Miners Certificates	1903 – 1905
GOV 192	Index of Free Miners Certificates	1905 – 1906
GOV 828	Free Miners Certificate Receipts Arrangement: Numerical Coverage: Issued at Tagish	1899
GOV 384	(Index of Free Miners Certificates?)	1903 - 1906

## I-10 ROYALTY LEDGER BOOKS, 1898 – 1909

These ledgers were maintained to record the royalty paid on gold production. Royalties were most important before 1901 when an increase in the allowable exemption made this tax inapplicable to the vast majority of miners.

Royalty Books list such information as quantity of gold mined, value of production, exemption allowed, and royalties paid. The title of each book states the geographic coverage of the volume. Where more detailed information as to coverage is listed, this has usually been drawn from the book's table of contents.

Arrangement: By creek and claim number unless otherwise indicated.

Coverage: As indicated.

<u>Location</u>	<u>Title/Description</u>	<u>Dates</u>
GOV 193	Index – Royalty Ledger Arrangement: This index cross-references the Royalty Ledger for Bonanza and Eldorado Creeks, Vol. 217. It is organized by creek and gives page numbers for entries for individual claims. Coverage: This includes Canyon, Quartz, Bonanza, Eldorado, French, Adams, Cheechako, Skookum, Monte Cristo	1900 - 1901
GOV 194	Royalty Reports (2 copies) Arrangement: This appears to consist of copies of pages from royalty ledgers that were produced for examination by an auditor. Coverage: Mainly Bonanza	1898 - 1902
GOV 195	Bear Creek, Quartz Creek above and below, Redfords Coverage: Includes Matson and Doyle concession	1898 - 1901
GOV 196	Tributaries of Bonanza	1898 - 1901
GOV 197	Gold Hill, French Hill, Cheechako Hill	1898 - 1901
GOV 198	Dominion Creek Coverage: Claims above and below Lower Discovery	1898 - 1901
GOV 199	Dominion Creek Coverage: Claims above and below Upper Discovery	1898 - 1901
GOV 200	Eldorado Coverage: Creek claims, French Gulch, Ora Grand Pup at 13, Gay Gulch	1898 - 1901
GOV 201	Eldorado Coverage: Hillside claims	1898 - 1900
GOV 202	Hunker Creek and Anderson Concession	1898 - 1899
GOV 203	Sulphur Creek	1898
GOV 204	Dominion Creek Coverage: Creek, Hillside and benches	1899
GOV 205	Dominion Creek Coverage: Hillside claims above and below Upper Discovery	1899 - 1901

<i>Location</i>	<i>Title/Description</i>	<i>Dates</i>
GOV 206	Eureka Creek and Pups Arrangements: by miner's name	
GOV 207	Gold Run Creek Coverage: Creek claims, hillsides and benches	1899 - 1901
GOV 208	Pup at 3 above Lower Discovery, Dominion, Green Gulch Coverage: Tributaries of Dominion, Tributaries of Sulphur	1899
GOV 209	Hunker Creek (hill) Note: Included insert of fragment of "Return of Royalty collected at Hunker Detachment" dating from 1901.	1899 - 1901
GOV 210	Hunker Creek Tributaries Coverage: Last Chance, Gold Bottom, Hard Luck, Eighty Pup (below), Neury Gulch, Nester Creek, Benches Last Chance, Tributaries Fifteen Pup	1899 - 1901
GOV 211	Hunker Creek Hills, Tributaries Arrangement: by collecting police officer	
GOV 212	Sulphur Creek Coverage: above and below Discovery and hillside	1899 - 1901
GOV 213	Bear Creek and Tributaries Coverage: includes Lindow Creek	1900 - 1901
GOV 214	Lower Bonanza and Tributaries Coverage: 62 – 113 below, various benches and hills, Lovett Gulch, Trail Creek, American Gulch, Gulch at 8/A below	1900 - 1901
GOV 215	Dominion Creek Coverage: above and below Upper Discovery, above and below Lower Discovery, Pups	1900
GOV 216	Hillsides Left Limit Dominion Coverage: above and below Upper and Lower Discovery	1900
GOV 217	Bonanza and Eldorado Creeks, Gulches and Tributaries Arrangement and Coverage: see Index, Vol 193	1900 - 1901
GOV 218	Hunker Creek and Tributaries Coverage: Includes section on Anderson Government Concession	1900
GOV 219	Canyon, Quartz, Eureka, Little Blanche, Boulder Coverage: Includes A. Macks discovery on Quartz and the Left Fork and 18 Pup on Eureka	1901
GOV 220	Dominion Creek, Tributaries and Pups Coverage: above and below Upper Discovery, hillsides, No. 3 and 15 Pups, Caribou Creek, Little Dominion, Lombard, Dougherty Concession	1901

<u>Location</u>	<u>Title/Description</u>	<u>Dates</u>
GOV 221	Dominion Creek and Pups Note: Annotation on this states "Cancelled and transferred into Ledger No. 27". This is apparently Yukon Archives Vol. 220.	1901
GOV 222	Eureka Creek Right Fork Coverage: Claims above Discovery	1901
GOV 223	Gold Run Creek Arrangement: by date royalty paid	1901
GOV 224	Gold Run Creek Coverage: Creek claims and hillsides	1901
GOV 225	Hunker Creek Hills and Tributaries	1901
GOV 226	Sulphur Creek Arrangement: This book is organized by date royalty collected	1901
GOV 227	Sulphur Creek Hill, Bench, Gulch Coverage: Sulphur hillsides, Green Gulch, Meadow Gulch	1900 - 1901
GOV 228	Forty Mile Arrangement: by date royalty paid	1902 - 1909

## I-11 WATER RIGHTS RECORD BOOK

These books provided a record of applications for diverting water for placer mining purposes. Entries list the number and date of application, the applicant's name and file number, the creek and location from which water was to be taken, as well as the locations at which water was to be used. The names of those protesting the diversion were entered, along with the remarks. The grant number, date of issue and amount of fee were also recorded when water rights were granted.

Arrangement: by creek unless otherwise indicated  
 Coverage: as indicated

<u>Location</u>	<u>Title/Description</u>	<u>Dates</u>
GOV 229	Water Rights Register and Cash Book Coverage: Hunker, All Gold, Flat, Goring, Leotta, Too Much Gold, Strickland and Tributaries	1900 - 1920
GOV 230	Water Rights Register and Cash Book Coverage: Klondike and small Tributaries, Rock, Bear, Yukon and small Tributaries, Indian and small Tributaries, Eureka, Forty Mile, Quartz, Sulphur, Duncan, Clear, White, Nansen	1900 - 1920
GOV 231	Water Rights Register and Cash Book Coverage: Bonanza and Eldorado and their Tributaries, Glacier, Wadleigh, Moose and Tributaries, Miller, Bedrock, Pat Murphy, Scott	1900 - 1938
GOV 232	Water Rights Register and Cash Book Coverage: Dominion, Goldrun and their Tributaries, Henderson, Thistle, Selwyn River and their Tributaries, Black Hills, Lower Stewart	1900 - 1934
GOV 233	Water Rights Register and Cash Book Coverage: Sixty Mile District	1902 - 1918
GOV 234	Water Rights Register Arrangement: Indexed alphabetically by creek name. Included quantity of water taken and duration of right. Coverage: Dawson area	1934 - 1963

## I-12 MISCELLANEOUS PLACER MINING RECORDS, 1898 – 1964

These records do not appear to fit in any of the other sections of placer mining records. They include records of hydraulic and dredging leases, trust account receipts, and a record of auction sales of government claims.

<u>Location</u>	<u>Title/Description</u>	<u>Dates</u>
GOV 352	Record Book Hydraulic Mining Leases Contents: This encompasses an alphabetical index of persons applying for hydraulic leases. The leases themselves are described and correspondence relating to the lease is listed.	1898 – 1900
GOV 353	Hydraulic Cash Book Arrangement: Chronological	1900 – 1911
GOV 354	Hydraulic Leases Contents: Leases are presented in numerical order. Transactions concerning the lease are recorded.	1899 – 1964
GOV 356	Prospecting Leases Arrangement: chronological Coverage: Dawson area and Yukon generally	1950 - 1962
GOV 358	Dredging Leases, Coal Leases, Refused Applications Arrangement: Dredging leases are arranged by creek, river or area and are indexed. There is a section for coal leases and a section for refused applications.	1899 - 1948
GOV 360	Power of Attorney Record Arrangement: Alphabetically showing persons extending and receiving power of attorney	1900 -1925
COV 824	Water Right Applications Coverage: numbers 7501 - 7507	1908 - 1918
GOV 826	Application to use or divert water Coverage: number 809	1902 - 1903
GOV 827	Notes on Mining Recorders Records Contents: These were probably prepared at the time of microfilming in the 1970's	No Date
GOV 828	Trust Account Interim Receipts Coverage: These are from the Mining Recorder's Office, Whitehorse	1921
GOV 1189(1)	Government Auction Sales Arrangement: An alphabetical index cross-references the various creeks. Claims are listed along with prices received. Coverage: Dawson area	1900
